

MEMORANDUM

FOR

OFFICE USE ONLY

RE: Proof of Appropriation on Applications for Paul E. Reimann  
in Mount Aire Canyon

On August 30, 1982 Harold Donaldson and I met with DCH to discuss the above-referenced subject. This was done pursuant to certain questions Mr. Reimann had posed to Harold and I regarding what the State Engineer would accept as sufficient for proof of appropriation.

In the meeting DCH advised as follows:

1. Grant extensions of time for three (3) years, recognizing delays caused by litigation and difficulty in obtaining building permits. The memorandum decisions granting these extensions of time should advise the applicant as to what is acceptable for proof, and should also suggest filing segregation applications.
2. Multiple-family units are acceptable if there are indeed separate facilities like a duplex, triplex, etc. have.
3. Trailers are acceptable if they are there for the season and we can see them.
4. Standpipes and dipping from springs are not acceptable for proof of appropriation.
